DELTA PATENTS

Life Sciences and Pharma

- Genomics (NGS technologies and microarrays), proteomics, metabolomics/metabonomics, bio-nanotechnology and related technologies
- 3-D molecular modelling structure-based drug discovery (virtual ligand screening)
- Plant biotechnology (in particular plant secondary metabolism)
- Fungal biotechnology
- Medical biotechnology
- Microbiology
- RNA biology, RNA interference
- Pharmaceutical, chemical and life sciences
- Neurogenomics and cancer genomics
- Drug delivery systems
- Drug discovery tools
- Diagnostics /prognostics
- Medical devices
- Vaccines
- Immunology
- Gene therapy
- Therapeutics
- Fermentation processes
- Pharmaceuticals and intermediates
