Training for Patent Professionals

EQE BASIC LEGAL DISTANCE LEARNING

DELTAPATENTS WELCOMES YOU

Why DeltaPatents?

DeltaPatents is a **patent attorney firm** based in the Netherlands with a passion for quality. We provide the highest quality advice and service to public and private companies at various stages of growth from start-up to Fortune 500. All our patent specialists have a deep technological knowledge and extensive industrial experience at companies like Philips, NXP, ASML, AstraZeneca and Shell. Through our education activities, we stay ahead in terms of law changes, case law and procedural requirements.

We are proud to be a leading training organization for the **European Qualifying Examination (EQE)**. Our renowned courses can be followed throughout Europe. We are the only training organization with a complete range of courses and high quality training material for the EQE. The knowledge and experience gained during more than a decade of EQE training provides a solid basis for our comprehensive range of training courses in different areas. We offer **Continuing Education of Patent Attorneys** (e.g. patent law update course, a Unitary Patent course, and various IP master classes). For **R&D** (R&D managers, researchers, developers, inventors, entrepreneurs, IP management, IP coordinators and tech-transfer officers), we provide targeted IP tutorials, a Portfolio and Strategy course, and several workshops.

“It was a pleasure to study with such a skilled and nice instructor”

Our **blogs** keep you up-to-date on the EQE, European patent law, in particular case law, and progress of the Unitary Patent Court (UPC) and the Unified Patent.

In 2006 we started **training IP support staff**, culminating in a full training program preparing for the official Dutch Formalities Officers exam. The training modules are now offered throughout Europe.

Our training focuses on giving insight and understanding, and ensuring that the acquired knowledge can be practically applied. Unique for DeltaPatents is that we thoroughly train and guide our tutors. For our tutors, training is a profession, mastered by teamwork and frequent involvement in courses. We take feedback of attendants seriously and act on it. For us, quality and customer satisfaction are essential.

DeltaPatents' personal touch

We believe in teaching and treating candidates with a personal touch. You will be trained in small groups, giving ample opportunity to discuss unclear issues in more detail and get personal assistance.

Hospitality is important to us. For candidates staying in Eindhoven for a couple of days, we always organize a social event, such as a dinner or a trip to a local place of interest. We welcome contact (e.g. via e-mail, telephone or video chat) with our tutors to ask follow-up questions, to clarify course materials or to report mistakes.

EQE BASIC LEGAL DISTANCE LEARNING

Objective

For candidates without access to a thorough and competent training, this unique course provides study materials and individual feedback in a flexible form, allowing the preparation to be done at a convenient time and place.

Course Concept

This course is based on the 8-day Basic Legal Course, the first training course of its kind in Europe which reduces the legal syllabus of the EQE to focus solely on the Pre-Exam. It offers the benefits of DeltaPatents training and materials without attending the sessions in the Netherlands. Instead of face-to-face contact, access to a knowledgeable tutor is provided in the form of individually marked answers to questions, video conference sessions and the possibility to send questions by e-mail. Using our experiences from many past candidates, the homework and marking is concentrated on the subjects which tend to require the most help.

Both procedural and substantive aspects are covered including the legal backgrounds for the claim interpretation subjects are included. However, it is highly recommended that candidates supplement this distance learning with drafting and amendment practice, either in their day-to-day work or by following our 2-day Claim Analysis course.

The Pre-Exam syllabus has been divided into EPC and PCT modules. The course is based around a study planner, which indicates the modules to be studied, and a hand-in schedule for the homework.

Video conference sessions

Every two weeks a video conference group session will be scheduled to discuss the most important topics of the subjects studied. Candidates are expected to study the subjects in advance and make homework questions. The video conference will include an interactive and open discussion between tutor and candidates on topics studied and problems encountered answering the questions.

Please note that participating in these sessions depends on the availability of appropriate technical facilities of the candidates (and DeltaPatents).

Who should participate?

Two years of experience in the relevant field of patent creation and prosecution are recommended. The course is ideal for first-time sitters wishing to prepare for the Pre-Exam paper in a structured and in-depth way. Candidates without any basic legal training, preparing for the EQE Main Exam, can also participate. Although a complete course in itself, it may also be used to supplement other forms of training.

Participants are provided with handouts of the overhead sheets used in the lessons. These provide an overview of each module, and illustrate the legal structure and procedural deadlines. Additional handouts relevant to the module may also be provided, giving extra explanation or providing examples.

In addition a study guide is provided, with the essential reading for each module – the key topics, the relevant articles and rules, Guidelines and Applicants Guide sections, and OJEPD notices/decisions.

After studying the overhead handouts and the references in the study guide, participants are asked to answer questions designed to test the absorption and understanding of the study. About 30% of these homework questions are true/false pre-exam format.

The answers to the homework are to be handed either by e-mail or by fax, about every 2 weeks. These dates are fixed. Homework will be discussed during the 2-weekly video conference sessions with the tutor.

The homework questions comprise approximately 70% open questions and 30% true/false pre-exam format. We correct part of the open questions, providing detailed marking sheets and individual feedback so that mistakes and gaps in the knowledge can be identified. For the rest of the questions, we provide our own model solutions so that participants can correct their own answers. The multiple choice model solutions include comments on why the other options were incorrect.

Every two weeks a video conference group session will be scheduled.
