Training for Patent Professionals

**EQE MAIN EXAM
CORRECTION OF
EQE PAPERS**

DELTAPATENTS WELCOMES YOU

Why DeltaPatents?

DeltaPatents is a **patent attorney firm** based in the Netherlands with a passion for quality. We provide the highest quality advice and service to public and private companies at various stages of growth from start-up to Fortune 500. All our patent specialists have a deep technological knowledge and extensive industrial experience at companies like Philips, NXP, ASML, AstraZeneca and Shell. Through our education activities, we stay ahead in terms of law changes, case law and procedural requirements.

We are proud to be a leading training organization for the **European Qualifying Examination (EQE)**. Our renowned courses can be followed throughout Europe. We offer a complete range of courses and high quality training material for the EQE. The knowledge and experience gained during more than a decade of EQE training provides a solid basis for our comprehensive range of training courses in different areas. We offer **Continuing Education of Patent Attorneys** (e.g. patent law update course, a Unitary Patent course, and various IP master classes).

For **R&D** (R&D managers, researchers, developers, inventors, entrepreneurs, IP management, IP coordinators and tech-transfer officers), we provide targeted IP tutorials, a Portfolio and Strategy course, and several workshops.

“It was a pleasure to study with such a skilled and nice instructor”

Our **blogs** keep you up-to-date on the EQE, Case law, Patent procedures, Unitary Patent and Dutch IP News.

In 2006 we started **training IP support staff**, culminating in a full training program preparing for the official Dutch Formalities Officers exam. The training modules are now offered throughout Europe.

Our training focuses on giving insight and understanding, and ensuring that the acquired knowledge can be practically applied. Unique for DeltaPatents is that we thoroughly train and guide our tutors. For our tutors, training is a profession, mastered by teamwork and frequent involvement in courses. We take feedback of attendants seriously and act on it. For us, quality and customer satisfaction are essential.

DeltaPatents' personal touch

We believe in teaching and treating candidates with a personal touch. You will be trained in small groups, giving ample opportunity to discuss unclear issues in more detail and get personal assistance.

Hospitality is important to us. For candidates staying in Eindhoven for a couple of days, we always organize a social event, such as a dinner or a trip to a local place of interest. We welcome contact (e.g. via e-mail, telephone or video chat) with our tutors to ask follow-up questions, to clarify course materials or to report mistakes.

EQE MAIN EXAM

CORRECTION OF EQE PAPERS

Objective

The aim is to improve the skills of candidates preparing for the European Qualifying Examination (EQE). After handing in an answer to an Exam Paper by the participant, the corrected homework will be returned with a detailed marking sheet and personal feedback. In this manner, the participant can identify his/her weaknesses and will know the areas he/she needs to concentrate on in the period up to the EQE thereby enabling him/her to improve the overall score on the Paper.

“I would like to take the opportunity to tell you that the quality of Delta patents training is part of my success in C and D.”

Concept

The participant will be required to hand in an answer to a recent Exam Paper, being a Paper A, Paper B, Paper C or Paper D. The homework will be corrected by a tutor and returned with a detailed marking sheet and comprehensive model solution. In addition, an analysis of the paper is given, demonstrating how a systematic approach, as taught in the methodology courses, would give the intended outcome.

For the EQE 2021 an online discussion session is offered. The tutor that corrected the papers will present the paper and discuss the main issues.

Strength of the programme

The tutors are experienced tutors involved in a variety of courses given by DeltaPatents and mark many papers; some tutors correct every year more than 100 papers of candidates preparing for the exam. The training programme typically spans papers of six different years, including most recent papers. The methodology courses are continuously updated according to changes in the law, case law, or the exam.

Similarly, the model solutions and analysis are continuously updated. Tutors regularly attend the tutor meeting organized by the Exam Committee.

Procedure

After enrolling, the selected Exam Paper will be sent to the participant in pdf format (for Paper D we have adapted the papers to keep them up-to-date).

Tutors will correct the handed-in solutions. The corrected papers with annotations, marking sheet and model solution is sent to the candidates before the online discussion session.

Online discussion session - English

For the EQE 2021 we schedule a video conference session for discussing the corrected exam papers. After correction of each paper, the marked and corrected paper will be send back to the candidates.

During the online session the tutor will re-do the paper. Then you will see how you should have written the paper.

For Paper C we will also present an extra case on a specific topic.

The sessions are scheduled beforehand.

The sessions will be recorded, so if you are not able to attend the live session, you can watch the recording afterwards

EQE 2020 candidates – refresh your knowledge

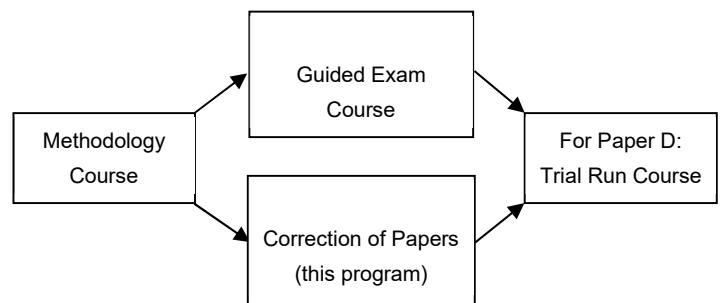

This Correction papers program is very useful for candidates who prepared for the EQE 2020. It's a nice way to pick up your knowledge, practice exam papers and learn from the corrections and discussion sessions.

Who should participate?

This program of “Correction of Exam Papers” is aimed at candidates preparing for the European Qualifying Examination. It is suitable for first-time sitters and this year especially for the EQE 2020 candidates. Participants are expected to have reached an advanced stage in their own preparations for the EQE.

Prior training

All of the training and model solutions are based upon DeltaPatents' methodology courses, developed and tested using the comments and experiences of many former candidates. Although a brief explanation is given, it is highly recommended that participants follow a Methodology course before doing this course.

Analysis and Model Solutions

The Analysis and Model Solutions demonstrate how to analyse the paper, how to apply the methodology, and gives the ‘correct’ answer, updated for the current law and current style of the exam.

Correction papers – German language

Only for Paper C we offer a Correction of papers in German language. The program includes the correction of the paper with comments of the tutor, a comprehensive model solution and analysis of the paper.
